

Isolator/Splitter

ISO2X4

UNIKA Isolator/Splitter
are the best way to get your party Rock!

The ISO2X4 is a passive audio isolator/splitter designed to be inserted into the signal chain to block hum and buzz caused by ground loops.

**Premium Grade Isolation
Output Transformer!**

**Excellent Signal Fidelity,
Distortion Free!**

**Radio Frequency
Interference (RFI) Blocking!**

Main Features

- ▼ On the ISO2X4 there are 2 inputs and 4 outputs, it is designed to be operated as a dual 2 outputs splitter, or mono 4 outputs splitter.
- ▼ In dual 2 outputs splitter mode, the input-1 audio will be split into 2 separate outputs which are the output-1&2, while the channel-2 audio input will split into separate outputs 3&4.
- ▼ In mono 4 outputs splitter mode, the 2 audio inputs are summed and then split into 4 separate outputs 1, 2, 3 & 4.
- ▼ Each isolated output pass through a premium transformer, which blocks DC voltage and prevents buzz and hum from ground loops.
- ▼ All of the outputs feature individual ground lift switches, which help further reduce ground loop noise.
